 - (ii) the tanker is proceeding *en route*;

Section 10

- (iii) the instantaneous rate of discharge of oil content does not exceed 30 litres per nautical mile;
 - (iv) if the tanker is delivered on or before 31 December 1979—the total quantity of oil discharged into the sea does not exceed one part in 15,000 parts of the total quantity of the cargo of oil of which oil discharged formed a part;
 - (v) if the tanker is delivered after 31 December 1979—the total quantity of oil discharged into the sea does not exceed one part in 30,000 parts of the total quantity of the cargo of oil of which oil discharged formed a part;
 - (vi) the tanker has in operation an oil discharge monitoring and control system and a slop tank arrangement as required under regulations made for the purposes of section 130 of the *Navigation Act 2012*; and
- (f) the discharge of oil or an oily mixture from the cargo area of an oil tanker, either within or outside a special area, if the discharge is of clean or segregated ballast.
- (5) A reference to an oily mixture in subsection (4) shall be read as not including a reference to an oily mixture that contains:
- (a) chemicals or other substances in quantities or concentrations that are hazardous to the marine environment; or
 - (b) chemicals or other substances that have been introduced for the purpose of attempting to prevent the application of subsection (1) to the discharge of an oily mixture from a ship.

10 Prohibition of discharge of oil residues into sea

- (3) If:
- (a) an oil residue is discharged from an Australian ship into the sea; and
 - (b) such a discharge cannot occur without the commission of an offence against subsection 9(1B) or of an offence against a law of a State or Territory;

the master, the charterer and the owner of the ship each commit an offence punishable, on conviction, by a fine not exceeding 20,000 penalty units.

Legislation history and amendment history—Endnotes 3 and 4

Amending laws are annotated in the legislation history and amendment history.

The legislation history in endnote 3 provides information about each law that has amended (or will amend) the compiled law. The information includes commencement details for amending laws and details of any application, saving or transitional provisions that are not included in this compilation.

The amendment history in endnote 4 provides information about amendments at the provision (generally section or equivalent) level. It also includes information about any provision of the compiled law that has been repealed in accordance with a provision of the law.

Editorial changes

The *Legislation Act 2003* authorises First Parliamentary Counsel to make editorial and presentational changes to a compiled law in preparing a compilation of the law for registration. The changes must not change the effect of the law. Editorial changes take effect from the compilation registration date.

If the compilation includes editorial changes, the endnotes include a brief outline of the changes in general terms. Full details of any changes can be obtained from the Office of Parliamentary Counsel.

Misdescribed amendments

A misdescribed amendment is an amendment that does not accurately describe the amendment to be made. If, despite the misdescription, the amendment can

be given effect as intended, the amendment is incorporated into the compiled law and the abbreviation “(md)” added to the details of the amendment included in the amendment history.

If a misdescribed amendment cannot be given effect as intended, the abbreviation “(md not incorp)” is added to the details of the amendment included in the amendment history.
