Medical Research Future Fund Act 2015

No. 116, 2015

An Act to establish the Medical Research Future Fund, and for related purposes

[Assented to 26 August 2015]

Preamble

The Parliament of Australia recognises that the health and wellbeing of all Australians is essential to the future of Australia. Discoveries in medical research and important medical innovations in the future will contribute to improving the health and wellbeing of all Australians.

In order for medical research and medical innovation to support a healthy and productive nation, long-term and large-scale funding is

Part 1 Preliminary

Section 1

required. The Parliament believes that the establishment of a perpetual fund capable of generating income over the long term is the most appropriate mechanism for ensuring that this funding is available on an ongoing basis. The Commonwealth has a role in meeting this funding need as it is able to marshal and deploy resources not available through other means.

Funding a system for medical research and medical innovation requires a national approach. The establishment of the Medical Research Future Fund and its administration will ensure that a coherent and consistent approach is adopted in the funding of medical research and medical innovation to ensure that such research and innovation benefits all Australians.

The Parliament of Australia enacts:

The Medical Research Future Fund consists of the Medical Research Future Fund Special Account and the investments of the Medical Research Future Fund. Initially, its investments are a portion of the investments of the Health and Hospitals Fund which was established under the *Nation-building Funds Act 2008*. - (b) channelling grants to the MRFF Health Special Account to make grants of financial assistance to certain bodies; and
- (c) making grants of financial assistance directly to corporate Commonwealth entities.

Debits are made from the Medical Research Future Fund Special Account by the Finance Minister after being required to do so by the Health Minister. The Health Minister takes the Australian Medical Research and Innovation Priorities (which are determined by the Australian Medical Research Advisory Board under Part 2A) into account in making decisions about the financial assistance that is provided from the Medical Research Future Fund Special Account.

The Medical Research Future Fund Special Account can also be debited in relation to costs and other obligations incurred by the Future Fund Board in managing the Fund.
