*Environment Protection and Biodiversity Conservation Act 1999*

**List of Exempt Native Specimens**

I, David Kemp, Minister for the Environment and Heritage, pursuant to subsection 303DB(1) of the *Environment Protection and Biodiversity Conservation Act 1999*, hereby establish the list of exempt native specimens as set out in the Schedule hereto.

This instrument will take effect on 11 January 2002.

Dated this 29th day of Nov 2001

DAVID KEMP

Minister for the Environment and Heritage

## Schedule

### List of Exempt Native Specimens

#### *Environment Protection and Biodiversity Conservation Act 1999*

This is a list of native specimens that are exempt from export regulations. The list includes only specimens that are, or are derived from, Australian native animals and plants.

The 'Taxon' column of the list includes the scientific name of the listed taxa. The structure of the list is described in more detail below.

The 'Common Name' column of the list is included for information only and the scientific name determines if a species is included on the list.

Inclusion of a specimen on the list may be subject to conditions and these conditions are included in the 'Notation' column. Only specimens satisfying these conditions will be exempt from export regulations. The exemption **does not** include live mammals, birds, reptiles or amphibians.

It is intended that specimens with a date in the 'Notation' column are exempt until 1 December 2003 at which time this list will be reviewed and amended. Only those species recognised as being harvested in accordance with sustainable and ecologically based management arrangements will be included on this list after 1 December 2003.

For the purposes of this list the term 'personal baggage' refers to a personal effect of a person departing from Australia, that is within the personal baggage of the person departing from Australia, and is not intended to be used for any commercial purpose, including sale, lease, hire or exchange.

The list of specimens is organised as follows:
