

# Renewable Energy (Electricity) Amendment Regulation 2012 (No. 6)<sup>1</sup>

**Select Legislative Instrument 2012 No. 182**

---

I, QUENTIN BRYCE, Governor-General of the Commonwealth of Australia, acting with the advice of the Federal Executive Council, make the following regulation under the *Renewable Energy (Electricity) Act 2000*.

Dated 2 August 2012

QUENTIN BRYCE  
Governor-General

By Her Excellency's Command

GREG COMBET  
Minister for Climate Change and Energy Efficiency

---

**1 Name of regulation**

This regulation is the *Renewable Energy (Electricity) Amendment Regulation 2012 (No. 6)*.

**2 Commencement**

This regulation commences on the day after it is registered.

**3 Amendment of *Renewable Energy (Electricity) Regulations 2001***

Schedule 1 amends the *Renewable Energy (Electricity) Regulations 2001*.

**Schedule 1 Amendments**

(section 3)

**[1] Paragraph 22X (1B) (b)**

*omit*

2012.

*insert*

2012;

**[2] After paragraph 22X (1B) (b)**

*insert*

(c) for an activity mentioned in Parts 45 and 46 of Schedule 6—before 30 September 2012.

**[3] Schedule 6, subclause 658 (3)**

*substitute*

- (3) For the production of coke oven coke, the electricity baseline for calculating the amount of a liable entity's partial exemption is 0.0397 MWh per tonne of coke oven coke on a dry weight basis that:
- (a) meets the necessary requirements for use in the integrated iron and steel manufacturing process; and
  - (b) is produced as part of carrying on the emissions-intensive trade-exposed activity; and
  - (c) is not a relevant product for the emissions-intensive trade-exposed activity of production of coke oven coke.

**[4] Schedule 6, paragraph 658 (4) (b)**

*omit*

activity.

*insert*

activity; and

**[5] Schedule 6, after paragraph 658 (4) (b)**

*insert*

- (c) is not a relevant product for the emissions-intensive trade-exposed activity of production of lime.

**[6] Schedule 6, after Part 44**

*insert*

**Part 45 Production of coke oven coke**

**Division 1 Production of coke oven coke**

**731 Production of coke oven coke**

The production of coke oven coke is the physical and chemical transformation (at a temperature higher than 900 °C) of coal into coke oven coke that:

- (a) has a coke strength after reaction (CSR) value of more than 50% for at least 80% of the coke oven coke produced; and
- (b) has a coke reactivity index (CRI) value of less than 40% for at least 80% of the coke oven coke produced.

**Division 2 Classification of activity**

**732 Classification of activity**

The production of coke oven coke is a highly emissions-intensive activity.

**Division 3 Electricity baseline for calculating partial exemption**

**733 Electricity baseline for product**

The electricity baseline for calculating the amount of a liable entity's partial exemption in respect of the production of coke oven coke is 0.0109 MWh per tonne of coke oven coke on a dry weight basis that:

- (a) has a coke strength after reaction (CSR) value of more than 50% for at least 80% of the coke oven coke produced; and

- (b) has a coke reactivity index (CRI) value of less than 40% for at least 80% of the coke oven coke produced; and
- (c) is not a relevant product for the emissions-intensive trade-exposed activity of integrated iron and steel manufacturing; and
- (d) is produced by carrying on the emissions-intensive trade-exposed activity; and
- (e) is of saleable quality.

*Note* *Saleable quality* is defined in regulation 22C.

## **Part 46 Production of hydrogen peroxide**

### **Division 1 Production of hydrogen peroxide**

#### **734 Production of hydrogen peroxide**

The production of hydrogen peroxide is the chemical transformation of hydrogen (H) feedstocks and oxygen (O) feedstocks:

- (a) to produce crude aqueous hydrogen peroxide solution that has a concentration of hydrogen peroxide ( $\text{H}_2\text{O}_{2(\text{aq})}$ ) of at least 39% with respect to mass; and
- (b) to later produce saleable aqueous hydrogen peroxide solution that has a concentration of hydrogen peroxide ( $\text{H}_2\text{O}_{2(\text{aq})}$ ) of at least 34% with respect to mass.

### **Division 2 Classification of activity**

#### **735 Classification of activity**

The production of hydrogen peroxide is a moderately emissions-intensive activity.

**Division 3 Electricity baseline for calculating partial exemption**

**736 Electricity baseline for product**

The electricity baseline for calculating the amount of a liable entity's partial exemption in respect of the production of hydrogen peroxide is 0.858 MWh per tonne of 100% equivalent hydrogen peroxide in saleable aqueous hydrogen peroxide solution that:

- (a) has a concentration of hydrogen peroxide ( $\text{H}_2\text{O}_{2(\text{aq})}$ ) of at least 34% with respect to mass; and
- (b) is produced by carrying on the emissions-intensive trade-exposed activity; and
- (c) is of saleable quality.

*Note* **Saleable quality** is defined in regulation 22C.
