1. LEGISLATIVE CONTEXT

Vehicle Standard (Australian Design Rule 58/00 — Requirements for Omnibuses Designed for Hire and Reward) 2006 Amendment 2 is made under the *Motor Vehicle Standards Act 1989* (the Act). The Act enables the Australian Government to establish nationally uniform standards that apply to new road vehicles when they are first supplied to the market in Australia. The Act applies to such vehicles whether they are manufactured in Australia or imported.

The making of the vehicle standards necessary for the Act's effective operation is provided for in section 7 which empowers the Minister to "determine vehicle standards for road vehicles or vehicle components".

Vehicle Standard (Australian Design Rule 58/00 – Requirements for Omnibuses Designed for Hire and Reward) 2006 (ADR 58/00) was originally determined in 2006 and was subsequently amended in 2012.

2. CONTENT AND EFFECT OF ADR 58/00 AND THE AMENDMENT

2.1. Overview of the ADR

The function of ADR 58/00 is to specify requirements for the construction of omnibuses designed for, and intended for, licensing, hire and reward.

2.2. Effect of the ADR Amendment

ADR 58/00 currently lists UN R 52/01 as an alternative standard for small omnibuses with an occupant capacity not exceeding 15 persons, including the driver. However, UN R 52/01 has been superseded by UN R 107.

The proposed change to ADR 58/00 is to allow UN R 107 from the 02 to the 05 series of amendments as a further alternative standard for small omnibuses.

The original ADR text will remain unchanged. This amendment does not increase the stringency of the ADR.

3. BEST PRACTICE REGULATION

3.1. Business Cost Calculator

There is no expected increase in cost to manufacturers, as the proposed amendment does not increase the stringency of the ADR.

3.2. General Consultation Arrangements

It has been longstanding practice to consult widely on proposed new or amended vehicle standards. For many years there has been active collaboration between the Federal Government and the state/territory governments, as well as consultation with industry and consumer groups. Much of the consultation takes place within institutional arrangements established for this purpose. The analysis and documentation prepared in a particular case, and the bodies consulted, depend on the

degree of impact the new or amended standard is expected to have on industry or road users.

Depending on the nature of the proposed changes, consultation could involve the Strategic Vehicle Safety and Environment Group (SVSEG), Australian Motor Vehicle Certification Board (AMVCB), Technical Liaison Group (TLG), Transport and Infrastructure Senior Officials' Committee (TISOC) and the Transport and Infrastructure Council.

- SVSEG consists of senior representatives of government agencies (Australian and state/territory), the National Transport Commission and the National Heavy Vehicle Regulator, the manufacturing and operational arms of the industry (including organisations such as the Federal Chamber of Automotive Industries and the Australian Trucking Association) and of representative organisations of consumers and road users (particularly through the Australian Automobile Association).
- AMVCB consists of technical representatives of government regulatory authorities (Australian and state/territory) that deal with ADR and other general vehicle issues, and the National Transport Commission and the National Heavy Vehicle Regulator.
- TLG consists of technical representatives of government agencies (Australian and state/territory), the National Transport Commission and the National Heavy Vehicle Regulator, the manufacturing and operational arms of the industry and of representative organisations of consumers and road users (the same organisations as represented in SVSEG).
- TISOC consists of state and territory transport and/or infrastructure Chief Executive Officers (CEO) (or equivalents), the CEO of the National Transport Commission, New Zealand and the Australian Local Government Association.
- The Transport and Infrastructure Council consists of the Australian, state/territory and New Zealand Ministers with responsibility for transport and infrastructure issues.

Editorial changes and changes to correct errors are processed by the Department of Infrastructure and Regional Development. This approach is only used where the amendments do not vary the intent of the vehicle standard.

Proposals that are regarded as significant need to be supported by a Regulation Impact Statement meeting the requirements of the Office of Best Practice Regulation (OBPR) as published in the *Best Practice Regulation Handbook* and the Council of Australian Governments *Principles and Guidelines for National Standard Setting and Regulatory Action for Ministerial Councils and Standard-Setting Bodies*.

3.3. Specific Consultation Arrangements for this Vehicle Standard

The change to allow UN R 107/(02 to 05) as an alternative standard for small omnibuses was requested by vehicle manufacturers. The proposed amendment was provided out of session to AMVCB members on 16 December 2013. No objections were subsequently raised.

As the amendment is minor in nature, and does not increase the stringency of the ADR, there is no need for further consultation through TISOC, the Transport and Infrastructure Council, or the public comment process.

3.4. Regulation Impact Statement

As the proposed amendment does not increase the stringency of the ADR, a Regulation Impact Statement is not required.

Since the decision is made by the Assistant Minister for Infrastructure and Regional Development without reference to the Transport and Infrastructure Council and the proposal is not considered significant, the Office of Best Practice Regulation requirements have been met for this regulatory proposal (OBPR Reference ID 16583).

4. STATEMENT OF COMPATIBILITY WITH HUMAN RIGHTS

The following Statement is prepared in accordance with Part 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*.

4.1. Overview of the Legislative Instrument

This amendment allows UN R 107/(02 to 05) as a further alternative standard for some small omnibuses.

4.2. Human Rights Implications

This amendment to ADR 58/00 does not engage any of the human rights and freedoms recognised or declared in the international instruments listed in section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*.

4.3 Conclusion

This amendment to ADR 58/00 is compatible with human rights as it does not raise any human rights issues.
