

Schedule 26 Food produced using gene technology

Note 1 This instrument is a standard under the *Food Standards Australia New Zealand Act 1991* (Cth). The standards together make up the *Australia New Zealand Food Standards Code*. See also section 1.1.1—3.

Food produced using gene technology is regulated by paragraphs 1.1.1—10(5)(c) and (6)(g) and Standard 1.5.2. This standard lists food produced using gene technology, and corresponding conditions, for paragraph 1.5.2—3(a).

Note 2 The provisions of the Code that apply in New Zealand are incorporated in, or adopted under, the *Food Act 2014* (NZ). See also section 1.1.1—3.

S26—1 Name

This Standard is *Australia New Zealand Food Standards Code – Schedule 26 – Food produced using gene technology*.

Note Commencement:
This Standard commences on 1 March 2016, being the date specified as the commencement date in notices in the *Gazette* and the *New Zealand Gazette* under section 92 of the *Food Standards Australia New Zealand Act 1991* (Cth). See also section 93 of that Act.

S26—2 Interpretation

(1) In this Schedule, headings in bold type are for information only, and do not list food for the purpose of section 1.5.2—3.

(2) In this Schedule:

conventional breeding means all methods used to produce plants, excluding techniques that use gene technology.

line means:

- (a) a plant, the genetic material of which includes a transformation event or events; or
- (b) any plant, descended from the plant referred to in paragraph (a), that is the result of conventional breeding of that plant with:
 - (i) any other plant that does not contain a transformation event or events; or
 - (ii) any other plant that contains a transformation event or events, whether expressed as a line or event, that is listed in the table to section S26—3;
 - (iii) but shall not be taken to mean any plant derived solely as a result of conventional breeding.

soy leghemoglobin preparation means a cell lysate preparation that:

- (a) is derived from *Pichia pastoris* containing the gene for leghemoglobin c2 from *Glycine max*; and
- (b) contains soy leghemoglobin.

transformation event means a unique genetic modification arising from the use of gene technology.

S26—3 Permitted food produced using gene technology and conditions

(1) The table to subsection (4) and the table to subsection (7) list permitted food produced using gene technology.

(2) Items 1(g), 2(m), 7(e), (g) and (h), and 9(a) of the table to subsection (4) are subject to the condition that their labelling must comply with section 1.5.2—4.

Note That section requires the statement 'genetically modified'.

(2A) Products containing beta-carotene from item 6(b) of the table to subsection (4) are subject to the condition that their labelling must comply with section 1.5.2—4.

(3) Item 2(m) of the table to subsection (4) is also subject to the condition that, for the labelling provisions, unless the protein content has been removed as part of a

refining process, the information relating to *foods produced using gene technology includes a statement to the effect that the high lysine corn line LY038 has been genetically modified to contain increased levels of lysine.

(4) The table for this subsection is:

3 Soy leghemoglobin preparation	<i>Pichia Pastoris</i> containing the gene for leghemoglobin c2 from <i>Glycine max</i>	<ol style="list-style-type: none">1. May only be added to a meat analogue product to enable the use in that product of soy leghemoglobin as a nutritive substance in accordance with Standard 1.3.2.2. Must comply with the specifications set out in section S3—42.

Amendment History

The Amendment History provides information about each amendment to the Schedule. The information includes commencement or cessation information for relevant amendments.

These amendments are made under section 92 of the *Food Standards Australia New Zealand Act 1991* unless otherwise indicated. Amendments do not have a specific date for cessation unless indicated as such.

About this compilation

This is compilation No. 17 of Schedule 26 as in force on **22 July 2021** (up to Amendment No. 201). It includes any commenced amendment affecting the compilation to that date.

Prepared by Food Standards Australia New Zealand on **22 July 2021**.

Uncommenced amendments or provisions ceasing to have effect

To assist stakeholders, the effect of any uncommenced amendments or provisions which will cease to have effect, may be reflected in the Schedule as shaded boxed text with the relevant commencement or cessation date. These amendments will be reflected in a compilation registered on the Federal Register of Legislation including or omitting those amendments and provided in the Amendment History once the date is passed.

The following abbreviations may be used in the table below:

ad = added or inserted
 exp = expired or ceased to have effect
 rs = repealed and substituted
 am = amended
 rep = repealed

Schedule 26 was published in the Food Standards Gazette No. FSC96 on 10 April 2015 as part of Amendment 154 (F2015L00450 — 1 April 2015) and has since been amended as follows:
