

**COMMONWEALTH OF AUSTRALIA**

**Environment Protection and Biodiversity Conservation Act 1999**

**Amendment of List of Exempt Native Specimens**

I, PAUL MURPHY, Assistant Secretary, Wildlife Trade and Biosecurity Branch, as Delegate of the Minister for the Environment, pursuant to subsection 303DC(1) of the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act), hereby amend the list of exempt native specimens established under section 303DB of the EPBC Act by:

(a) deleting from the sections of the list headed “Bony fishes (Osteichthyes)” and “Freshwater and Marine Invertebrates” (both under the major group headed “Freshwater and Marine Animals”) the items set out in Schedule 1; and

(b) by including in the list, after the item “Marine or freshwater fish or invertebrates” in the section headed “General” (under the major group headed “Freshwater and Marine Animals”) the items set out in Schedule 2.

Dated this 13<sup>th</sup> day of November 2015

.....Paul Murphy.....

Delegate of the Minister for the Environment

## SCHEDULE 1 – Items to be deleted

Bony fishes (Osteichthyes)		
<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
<i>Acanthopagrus australis</i>	Yellowfin bream	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Acanthopagrus berda</i>	Pikey bream	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Acanthopagrus butcheri</i>	Black bream	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Acanthopagrus tapirini</i>	Black bream	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility; and Included on the list until 1 March 2010.
<i>Aldrichetta forsteri</i>	Yellow-eye Mullet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ambassis agassizi</i>	Agassiz's olive glassfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ambassis agrammus</i>	Sailfin glassfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ambassis interruptus</i>	Longspined glassfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ambassis macleayi</i>	Macleay's glassfish	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Ambassis marianus</i>	Estuary perchlet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ambassis nigripinnis</i>	Olive perchlet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ambassis sp</i>	Northwest glassfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Amblygobius phalaena</i>	Banded goby	the specimen, or the fish or invertebrate from

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amniataba percooides</i>	Black banded grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion akindynos</i>	Barrier Reef anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion chrysopterus</i>	Orange-fin anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion latezonatus</i>	Wideband anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion mccullochi</i>	McCulloch's anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion melanopus</i>	Red and black anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion melanopus</i>	Fire clownfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion ocellaris</i>	False-Clown anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion percula</i>	Clown anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion percula</i>	Orange clownfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion rubrocinctus</i>	Australian anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amphiprion</i> spp	Clown fish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.

<b>Taxon / Item</b>	<b>Common Name</b>	<b>Notation</b>
<i>Amphiprion akindynos</i>	Barrier Reef anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Anguilla australis</i>	Eel-short finned	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Anguilla reinhardtii</i>	Eel-long finned	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Anodontiglanis dahli</i>	Toothless catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Apogon cyanosoma</i>	Orange-lined cardinal fish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Argyrosomus japonicus</i>	Mulloway	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Argyrosomus hololepidotus</i>	Mulloway	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Argyrosomus japonicus</i>	Mulloway	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the South Australian <i>Fisheries Management Act 2007</i> and <i>Aquaculture Act 2001</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Arius berneyi</i>	Berney's catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Arius graeffei</i>	Graeffe's salmon catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Arius graeffei</i>	Lesser salmon catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Arius leptaspis</i>	Salmon catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Arius midgleyi</i>	Midgley's catfish	the specimen, or the fish or invertebrate from

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Arrhamphus sclerolepis</i>	Snub-nosed garfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Arrhamphus solerolepis</i>	Snub-nosed garfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Arripis georgianus</i>	Tommy Ruff	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Arripis trutta</i>	Australian salmon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Assessor macneilli</i>	Blue scissortail	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Awaous crassilabrus</i>	Roman nose goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Bidyanus bidyanus</i>	Silver perch	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Bidyanus welchi</i>	Welch's grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Bostrichthys zonatus</i>	Barred Gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Butis butis</i>	Crimson Tipped Gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Caranx sexfasciatus</i>	Bigeye trevally	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Chelmon rostratus</i>	Copperband butterflyfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.

<b>Taxon / Item</b>	<b>Common Name</b>	<b>Notation</b>
<i>Chlamydogobius eremius</i>	Desert goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Chlamydogobius japalpa</i>	Finke Goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Chlamydogobius ranunculus</i>	Tadpole goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Chromileptes altivelis</i>	Barramundi cod	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Chrysiptera talboti</i>	Talbot's demoiselle	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Chrysophrys auratas</i>	Snapper	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Coryphaena hippurus</i>	Mahi mahi	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Craterocephalus centralis</i>	Finke River Hardyhead	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Craterocephalus eyresii</i>	Lake Eyre hardyhead	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Craterocephalus marianae</i>	Mariana's Hardyhead	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Craterocephalus mariane</i>	Marianas hardyhead	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2009.
<i>Craterocephalus marjoriae</i>	Marjorie's hardyhead	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Craterocephalus stercusmuscarum</i> +ssp.	Fly-specked hardyhead	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Craterocephalus stramineus</i>	Blackmast	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Craterocephalus stercusmuscarum</i>	Fly-specked hardyhead	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Craterocephalus stramineus</i>	Blackmast	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Cromileptes altivelis</i>	Barramundi cod	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Cryptocentrus cinctus</i>	Yellow shrimp goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Cypho pupurascens</i>	Oblique-lined dottyback	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Denariusa bandata</i>	Penny fish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Ecsenius bicolor</i>	Bicolor blenny	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ecsenius midas</i>	Midas combtooth blenny	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Eleutheronema tetradactylum</i>	Blue salmon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Epinephelus coioides</i>	Estuary cod	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Epinephelus lanceolatus</i>	Queensland Giant grouper	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Epinephelus lanceolatus</i>	Queensland groper	the specimen, or the fish or invertebrate from

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Epinephelus coioides</i>	Estuary cod	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Epinephelus lanceolatus</i>	Queensland groper	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Gadopsis bispinosus</i>	Two-spined blackfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Gadopsis marmoratus</i>	River blackfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Galaxias maculatus</i>	Common jollytail	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Galaxias olidus</i>	Mountain galaxias	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Galaxias truttaceus</i>	Galaxias	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Gallaxiella pusilla</i>	Eastern dwarf galaxias	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Gerres filamentosus</i>	Threadfin Silver Bidy	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Girella tricuspidata</i>	Luderick	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Giurus margaritacea</i>	Snakehead gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Glossamia aprion</i>	Queensland mouthbrooder	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		the specimens are included in the list until 26 November 2015.
<i>Glossogobius aureus</i>	Golden tank goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Glossogobius celebius</i>	Celebes goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Glossogobius concavifrons</i>	Concave goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Glossogobius giurus</i>	Flathead goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Glossogobius sp. 1</i>	Dwarf goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Glossogobius sp. 2</i>	Mulgrave goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Glossogobius sp. 3</i>	Square blotch goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Glossolepis incisus</i>	Red rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Gobiomorphus australis</i>	Striped gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Gobiomorphus coxii</i>	Cox's gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Halichoeres chrysus</i>	Golden wrasse	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Hemigobius hoevenii</i>	Small goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Hephaestus carbo</i>	Coal Grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Hephaestus fuliginosus</i>	Sooty Grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Holothuria scabra</i>	Sandfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Hypseleotris compressa</i>	Empire gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Hypseleotris compressus</i>	Empire gudgeon	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2009.
<i>Hypseleotris galii</i>	Firetailed Gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Hypseleotris klunzingeri</i>	Western carp gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Hypseleotris sp. 1</i>	Lake's carp gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Hypseleotris sp.2</i>	Midgley's carp gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Hypseleotris sp.A</i>	Midgley's gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Iriatherina wernerii</i>	Threadfin Rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Kuhlia rupestris</i>	Jungle perch - northern strain	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Kurtus gulliveri</i>	Nursery fish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.

<b>Taxon / Item</b>	<b>Common Name</b>	<b>Notation</b>
<i>Labroides bicolor</i>	Bicolor Cleanerfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Labroides dimidiatus</i>	Common cleanerfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Labroides pectoralis</i>	Breastspot cleanerfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Labroides pectoralus</i>	Wrasse	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2009.
<i>Lates calcarifer</i>	Barramundi	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Latjanus argentimaculartus</i>	Mangrove jack	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Latjanus argentimaculatus</i>	Mangrove Jack	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Leiopotherapon unicolour</i>	Spangled perch	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Liza vaigiensis</i>	Diamond scale mullet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Lutjanus argentimaculartus</i>	Mangrove Jack	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Lutjanus argentimaculatus</i>	Mangrove Jack	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Lutjanus johnii</i>	Golden Snapper	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Lutjanus seabrae</i>	Red emperor	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Lutjanus sebae</i>	Red Emperor	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Maccullochella peelii</i>	Murray River cod	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Macquaira ambigua ambigua</i>	Golden perch Murray-Darling strain	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Macquaira ambigua n.sp</i>	Golden perch Cooper Creek/Lake Eyre strain	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Macquaria ambigua</i>	Golden perch	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Macquaria ambigua oriens</i>	Golden perch Fitzroy/Dawson strain	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Macquaria colonorum</i>	Estuary perch	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Macquaria novemaculata</i>	Australian Bass	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2009.
<i>Macquaria novemaculeata</i>	Australian Bass	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Megalops cyprinoides</i>	Oxeye herring	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Megalops cyprinoids</i>	Oxeye herring	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia boesemani</i>	Boesmani rainbow	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia duboulayi</i>	Duboulay's rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia eachamensis</i>	Lake Eachem rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia exquisita</i>	Exquisite rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Melanotaenia fluviatilis</i>	Murray rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia maccullochi</i>	McCulloch's rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia mccullochi</i>	McCulloch's Rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Melanotaenia nigrans</i>	Black banded rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Melanotaenia solata</i>	Northern rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Melanotaenia splendida</i>	Splendid rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia splendida australis</i>	Western rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Melanotaenia splendida inornata</i>	Chequered Rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Melanotaenia splendida inornata</i>	Chequered rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia splendida splendida</i>	Eastern rainbowfish	the specimen, or the fish or invertebrate from

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia splendida tatei</i>	Desert rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Melanotaenia spp.</i>	Rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia trifasciata</i>	Trifasciata rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Melanotaenia trifasciata</i>	Banded rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Mogurnda adspersa</i>	Purple-spotted gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Mogurnda larapintae</i>	Desert mogurnda	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Mogurnda mogurnda</i>	Purple spotted gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Mogurnda striata</i>	Trout gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Monodactylus argenteus</i>	Diamondfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Mugil cephalus</i>	Sea mullet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Mugilogobius filifer</i>	Threadfin mangrove goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Mugilogobius littoralis</i>	seep goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.

<b>Taxon / Item</b>	<b>Common Name</b>	<b>Notation</b>
<i>Mugilogobius platystomus</i>	Indonesian goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Mugilogobius rivulus</i>	Small goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Mugilogobius wilsoni</i>	Wilson's mangrove goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Myxus petardi</i>	Pinkeye mullet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Myxus spp.</i>	Mullet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Nannoperca australis</i>	Pygmy perch	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Nanoperca australis</i>	Pygmy perch	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the South Australian <i>Fisheries Management Act 2007</i> and <i>Aquaculture Act 2001</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Nannoperca australis</i>	Pygmy perch	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Nematalosa erebi</i>	Bony Bream	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Neoarius australis</i>	Fork tail catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Neosilurus hyrtlilii</i>	Hyrtl's catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Neosilurus ater</i>	Black catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Neosilurus hyrtlilii</i>	Hyrtl's tandan	the specimen, or the fish or invertebrate from

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Neosilurus lyrtlii</i>	Yellow fin Tandan	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Neosilurus sp.</i>	Mottled Tandan	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Neosilurus sp.</i>	Tandan	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Neosilurus sp.</i>	White Tandan	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Neosilurus sp.3</i>	Coopers Creek Tandan	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Neosilurus spp.</i>	Plotosidae	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the South Australian <i>Fisheries Management Act 2007</i> and <i>Aquaculture Act 2001</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Neosilurus spp.</i>	Eel-tailed catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Notesthes robusta</i>	Bullrout	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Odonteleotris macrodon</i>	Sinuous gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and The specimen is included on the list until 26 November 2015.
<i>Omobranchus anolius</i>	Oyster blenny	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ophieleotris aporos</i>	Snakehead gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ophiocara porocephala</i>	Spangled Gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Oxeleotris lineolata</i>	Sleepy cod	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Oxeleotris nullipora</i>	Poreless gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Oxycirrhites typus</i>	Longnose hawkfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Oxyeleotris aruensis</i>	Aru gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Oxyeleotris lineolata</i>	Sleepy Cod	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Oxyeleotris lineolatus</i>	Sleepy cod	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Oxyeleotris nullipora</i>	Poreless gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Oxyeleotris selheimi</i>	Giant gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Oxyelotris nullipora</i>	Poreless Gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pagrus auratus</i>	Snapper	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Parambassis gulliveri</i>	Giant perchlet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Paraplesiops bleekeri</i>	Eastern blue devil	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Paraplesiops powerii</i>	Northern blue devil	the specimen, or the fish or invertebrate from

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Parrambassis gulliveri</i>	Giant glassfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Periophthalmus argentilineatus</i>	Barred mudskipper	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Philypnodon grandiceps</i>	Flathead gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Philypnodon sp.1</i>	Dwarf flathead gudgeon	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pingalla gilberti</i>	Gilbert's grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pingalla lorentzi</i>	Lorentz's grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pingalla midgleyi</i>	Midgley's grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Platycephalus fuscus</i>	Dusky Flathead	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Plectropomus leopardus</i>	Coral trout	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pomacentrus coelestis</i>	Blue damsel	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pomadasyus kaakan</i>	Javelin grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Porochilus argenteus</i>	Silver tandan	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.

<i>Porochilus obbesi</i>	Obbes catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Porochilus rendahli</i>	Renhahl's tandan	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Premnas biaculatus</i>	Spine-cheeked anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Premnas biaculeatus</i>	Spine-cheek Anemonefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Prionobutis microps</i>	Small-eyed sleeper	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Protibea diacanthus</i>	Mulloway	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pseudaphritis urvillii</i>	Congolli	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pseudocaranx dentex</i>	Silver trevally	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pseudocheilinus hexataenia</i>	Six-line wrasse	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pseudochromis cyanotaenia</i>	Surge dottyback	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pseudochromis wilsoni</i>	Yellowfin dottyback	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pseudogobius olorum</i>	Blue-spot goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pseudomugil cyanodorsalis</i>	Blue-back blue-eye	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.

		November 2015.
<i>Pseudomugil gertrudae</i>	Spotted blue eye	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pseudomugil signifer</i>	Pacific blue eye	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pseudomugil tenellus</i>	Delicate blue-eye	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Rachycentron canadum</i>	Cobia	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Redigobius balteatus</i>	Rhinohorn goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Redigobius bikolanus</i>	Speckled goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Redigobius chryosoma</i>	Spotfin Goby	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Redigobius chryosoma</i>	Spotfin goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Retropinna semoni</i>	Smelt	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Rhadinocentrus ornatus</i>	Ornate rainbowfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Rhombosolea tapirina</i>	Greenback flounder	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Scatophagus argus</i>	Spotted scat	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Scleropages jardini</i>	Gulf garatoga	the specimen, or the fish or invertebrate from

		which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Scleropages jardinii</i>	Northern saratoga	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Scleropages leichardti</i>	Southern Saratoga	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Scomber australasicus</i>	Slimy Mackerel	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Scortum barcoo</i>	Barcoo grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Scortum hили</i>	Leathery grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Scortum ogilbyi</i>	Gulf grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Selenotoca multifasciata</i>	Butterfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Seriola lalandi</i>	Yellowtail kingfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Sicyopterus lagocephalus</i>	Rabbithead cling goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Sillaginodes punctata</i>	King George whiting	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility; and Included on the list until 1 March 2010.
<i>Sillaginoides punctata</i>	King George whiting	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Sillaginoides puntatus</i>	King George whiting	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Sillago ciliata</i>	Sand Whiting	the specimen, or the fish or invertebrate from

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Sillago ciliate</i>	Sand whiting	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Sillago schomburgii</i>	Yellowfin whiting	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Stichopus chloronotus</i>	Greenfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Strongylura krefftii</i>	Long tom	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Strongylura krefftii</i>	Freshwater longtom	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Synchiropus ocellatus</i>	Ocellated dragonet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Synchiropus stellatus</i>	Starry dragonet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Syncomistes butleri</i>	Butlers grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Syngnathoides biaculeatus</i>	Pipehorse	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Syngnathoides paegneus</i>	Ghost pipefish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Tandanus bostocki</i>	Freshwater cobbler	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Tandanus glencoensis</i>	Glencoe tandan	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.

<b>Taxon / Item</b>	<b>Common Name</b>	<b>Notation</b>
<i>Tandanus spp.</i>	Catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Tandanus tandanus</i>	Eel-tailed catfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Tateurndina ocellicauda</i>	Eye-spot sleeper	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Thenus indicus</i>	Moreton Bay bug	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Thenus orientalis</i>	Moreton Bay bug	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Thunnus maccoyii</i>	Southern bluefin tuna	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Toxotes chatareus</i>	Common archerfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Toxotes lorentzi</i>	Primitive archerfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Toxotidae chatareus</i>	Sevenspot archerfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Trachurus novaezelandiae</i>	Yellowtail Scad	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Trachystoma petardi</i>	Freshwater mullet	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Valenciennea strigata</i>	Blue-band goby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Varia lacustris</i>	Lake grunter	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.

Phylum: Mollusca		
Miscellaneous (not species specific)		
Species (in alphabetic sequence)		
<i>Alathyria jacksoni</i>	River mussel	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Amusium balloti</i>	Saucer scallops	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Austropeplea lessoni</i>	Blond Snail	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Chlamys asperrimus</i>	Doughboy scallop	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Chlamys bifrons</i>	Queen scallop	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Donax deltooides</i>	Goolwa cockles	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Dositia violacea</i>	Mud Nerite	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Equichlamys bifrons</i>	Queen Scallop	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Haliotis asinina</i>	Abalone	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Haliotis conicopora</i>	Brownlip Abalone	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Haliotis cyclobates</i>	Cyclobates abalone	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and

		the specimens are included in the list until 26 November 2015.
<i>Haliotis laevigata</i>	Greenlip abalone	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Haliotis roei</i>	Roe's abalone	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Haliotis rubra</i>	Blacklip abalone	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Haliotis scalaris</i>	Staircase abalone	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Hippopus hippopus</i>	Strawberry clam	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Katelysia rhytiphora</i>	Sand cockle	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Mimachlamys asperrimus</i>	Doughboy scallop	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Mytilus edulis</i>	Blue mussel	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Mytilus galloprovincialis</i>	Blue Mussel	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Notopala essingtonensis</i>	River Snail	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Notopala waterhousei</i>	Waterhouse's Snail	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate

		legislation. Included on the list until 1 December 2014.
<i>Octopus australis</i>	Southern octopus	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Octopus maorum</i>	Maori octopus	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Octopus pallidus</i>	Pale octopus	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ostrea angasi</i>	Native oyster	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Ostrea angassi</i>	Flat (mud) oysters	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Pecten fumatis</i>	Commercial scallop	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pecten fumatus</i>	Scallop	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pinctada albina</i>	Pearl oysters	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pinctada fucata</i>	Pearl oysters	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pinctada imbricata</i>	Akoya Pearl Oyster	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pinctada margaritifera</i>	Black lip pearl oysters	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pinctada maxima</i>	Gold lip pearl oyster	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.

<b>Taxon / Item</b>	<b>Common Name</b>	<b>Notation</b>
<i>Pinctada radiata</i>	Gem pearl oyster	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Pteria falcata</i>	Pearl oysters	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Pteria penguin</i>	Penguin pearl oyster	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Saccostrea cuculata</i>	Western rock oyster	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Saccostrea culculata</i>	Western rock oyster	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Western Australia <i>Fish Resource Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Saccostrea echinata</i>	Tropical rock oyster	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Sepia spp</i>	Cuttlefish	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Sepioteuthis australis</i>	Southern calamari	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Striostrea mytiloides</i>	Tropical rock oyster	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Subnivalia undulata</i>	Periwinkle	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Tapes dorsatus</i>	Estuarine clam	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Tectus pyramis</i>	Pyramid trochus	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation.

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		Included on the list until 1 December 2014.
<i>Tridacna crocea</i>	Burrowing clam	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Tridacna derasa</i>	Smooth giant clam	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Tridacna gigas</i>	Giant clam	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Tridacna maxima</i>	Giant clam	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Tridacna squamosa</i>	Fluted giant clam	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Trochus niloticus</i>	Trochus	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Velesunio ambiguss</i>	Freshwater mussel	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Velesunio ambiguus</i>	Billabong mussel	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<b>Phylum: Arthropoda</b>		
<i>Atyidae sp</i>	Freshwater shrimp	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2009.
<i>Atyidae sp.</i>	Freshwater shrimps	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation.

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
<i>Australatya striolata</i>	Riffle shrimp	Included on the list until 1 December 2014. The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Caridina gracilirostris</i>	Glass Shrimp	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Caridina indistincta</i>	Freshwater shrimp	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Caridina longirostris</i>	Glass Shrimp	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Caridina spp</i>	Atyuid Shrimp species	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Charybdis feriata</i>	Coral crab	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Cherax albidus</i>	Yabby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Cherax bicarinatus</i>	Koolatong Yabby	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Cherax cuspidatus</i>	Cusped crayfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Cherax destructor</i>	Yabbies	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Cherax quadricarinatus</i>	Red Claw Yabby	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in

		an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Cherax tenuimanus</i>	Marron	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Euastacus armatus</i>	Murray crayfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Euastacus bispinosa</i>	South East Freshwater Crayfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Euastacus spinifer</i>	Sydney crayfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Euastacus valentulus</i>	Strong crayfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Fenneropenaeus merguensis</i>	Banana prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Ibacus peronii</i>	Balmain bugs	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Jasus edwardsii</i>	Southern rock lobster	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Jasus verreauxi</i>	Eastern Rock Lobster	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Lysmata amboinensis</i>	Scarlet cleaner shrimp	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Macrobrachium australiense</i>	Freshwater shrimp	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries</i>

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		<i>Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Macrobrachium bullatum</i>	Small fresh water prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Macrobrachium handschini</i>	Handschin's River Prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Macrobrachium rosenbergii</i>	Freshwater shrimp	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Macrobrachium sp.</i>	Freshwater prawns	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Macrobrachium spp.</i>	Macrobrachium spp.	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Marsupenaeus japonicus</i>	Kuruma prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Melicertus plebejus</i>	Eastern king prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Melicertus latisulcatus</i>	Western king prawn	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Metapenaeus bennettiae</i>	Greasyback Prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Metapenaeus endeavouri</i>	School prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation.

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
<i>Metapenaeus ensis</i>	Offshore greasyback prawn	Included on the list until 1 December 2014. the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Metapenaeus insolitus</i>	School prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Metapenaeus macleayi</i>	School prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Metapenaeus spp.</i>	School prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Panulirus ornatus</i>	Tropical rock lobster - painted	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Panulirus versicolor</i>	Tropical rock lobster - green	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Paratya australiensis</i>	Freshwater shrimp	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Paratya spp.</i>	Paratya spp.	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Partya australiensis</i>	Glass shrimp	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Penaeus esculentus</i>	Brown tiger prawn	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Penaeus indicus</i>	Red legged banana prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.

<b>Taxon / Item</b>	<b>Common Name</b>	<b>Notation</b>
<i>Penaeus japonicus</i>	Karuma prawn	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. <i>Penaeus merguensis</i>	Banana prawn	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Penaeus monodon</i>	Black tiger prawn	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Portunus pelagicus</i>	Blue crabs	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Portunus sanguinolentus</i>	Three Spot crab	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Scylla olivacea</i>	Brown Mud Crab	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Scylla serrata</i>	Mud crab	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Scyllarus</i> sp	Moreton bay bugs	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Stenopus hispidus</i>	Banded coral shrimp	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Thenus</i> spp	Moreton Bay bug	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<b>Phylum: Cnidaria</b>		
<i>Clavularia ramosa</i>	Waving hand polyp	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation.

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		Included on the list until 1 December 2014.
<i>Entacmaea</i>	Bubble tipped anemone	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Galaxea acrihelia</i>	Starburst coral	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Heteractis crispata</i>	Leathery sea anemone	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Hydnophora rigida</i>	Horn coral	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Montipora digitata</i>	Staghorn coral	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Tripneustes gratilla</i>	Lamington urchin	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
Phylum: Echinodermata		
<i>Centrostephanus rodgersii</i>	Urchin	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Victorian <i>Fisheries Act 1995</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Centrostephanus rogersii</i>	Urchin	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Heliocidaris erythrogramma</i>	Purple sea urchin	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Holothuria nobilis</i>	Black teatfish	The specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation.

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
		Included on the list until 1 December 2014.
<i>Holothuria scabra.</i>	Sandfish	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Holothuria</i> sp	Sea Cucumber	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
Phylum: Annelida		
<i>Arenicola bombayensis</i>	Lug worm	The specimen, of the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Australonuphis parateres</i>	Beach worm	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Australonuphis teres</i>	Beach worm	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Diopatra aciculata</i>	Tube worm	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Diopatra dentata</i>	Tube worm	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Hirsutonuphis mariahirsuta</i>	Beach worm	The specimen, of the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.
<i>Marphysa sanguinea</i>	Bloodworms	the specimen, or the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility, and the specimens are included in the list until 26 November 2015.
<i>Perinereis helleri</i>	Sand worm	The specimen, of the fish or invertebrate from which it is derived, was produced lawfully in an aquaculture facility operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation. Included on the list until 1 December 2014.

## SCHEDULE 2 – Items to be included

<i>Taxon / Item</i>	<i>Common Name</i>	<i>Notation</i>
New South Wales - Specimens that are derived from fish or aquatic invertebrates or aquatic plants, other than specimens that belong to species listed under Part 13 of the EPBC Act and specimens that belong to taxa listed under section 303CA of the EPBC Act (Australia's CITES list), produced in aquaculture facilities operating in accordance with the New South Wales <i>Fisheries Management Act 1994</i> and subordinate legislation.		The specimen, or the fish or invertebrate from which it was derived, was produced lawfully in an aquaculture facility.  The specimens are included in the list until 25 November 2016.
Northern Territory - Specimens that are derived from fish or aquatic invertebrates or aquatic plants, other than specimens that belong to species listed under Part 13 of the EPBC Act and specimens that belong to taxa listed under section 303CA of the EPBC Act (Australia's CITES list), produced in aquaculture facilities operating in accordance with the Northern Territory <i>Fisheries Act 1988</i> and subordinate legislation.		The specimen, or the fish or invertebrate from which it was derived, was produced lawfully in an aquaculture facility.  The specimens are included in the list until 25 November 2016.
Queensland - Specimens that are derived from fish or aquatic invertebrates or aquatic plants, other than specimens that belong to species listed under Part 13 of the EPBC Act and specimens that belong to taxa listed under section 303CA of the EPBC Act (Australia's CITES list), produced in aquaculture facilities operating in accordance with the Queensland <i>Fisheries Act 1994</i> and subordinate legislation		The specimen, or the fish or invertebrate from which it was derived, was produced lawfully in an aquaculture facility.  The specimens are included in the list until 25 November 2016.
South Australia - Specimens that are derived from fish or aquatic invertebrates or aquatic plants, other than specimens that belong to species listed under Part 13 of the EPBC Act and specimens that belong to taxa listed under section 303CA of the EPBC Act (Australia's CITES list), produced in aquaculture facilities operating in accordance with the South Australian <i>Aquaculture Act 2001</i> and <i>Fisheries Management Act 2007</i> and subordinate legislation.		The specimen, or the fish or invertebrate from which it was derived, was produced lawfully in an aquaculture facility.  The specimens are included in the list until 25 November 2016.

<p>Tasmania - Specimens that are derived from fish or aquatic invertebrates or aquatic plants, other than specimens that belong to species listed under Part 13 of the EPBC Act and specimens that belong to taxa listed under section 303CA of the EPBC Act (Australia's CITES list), produced in aquaculture facilities operating in accordance with the <i>Tasmanian Living Resources Management Act 1995</i> and subordinate legislation.</p>		<p>The specimen, or the fish or invertebrate from which it was derived, was produced lawfully in an aquaculture facility.</p> <p>The specimens are included in the list until 25 November 2016.</p>
<p>Victoria - Specimens that are derived from fish or aquatic invertebrates or aquatic plants, other than specimens that belong to species listed under Part 13 of the EPBC Act and specimens that belong to taxa listed under section 303CA of the EPBC Act (Australia's CITES list), produced in aquaculture facilities operating in accordance with the <i>Victorian Fisheries Act 1995</i> and subordinate legislation</p>		<p>The specimen, or the fish or invertebrate from which it was derived, was produced lawfully in an aquaculture facility.</p> <p>The specimens are included in the list until 25 November 2016.</p>
<p>Western Australia - Specimens that are derived from fish or aquatic invertebrates or aquatic plants, other than specimens that belong to species listed under Part 13 of the EPBC Act and specimens that belong to taxa listed under section 303CA of the EPBC Act (Australia's CITES list), produced in aquaculture facilities operating in accordance with the <i>Western Australian Fish Resources Management Act 1994</i> and subordinate legislation.</p>		<p>The specimen, or the fish or invertebrate from which it was derived, was produced lawfully in an aquaculture facility.</p> <p>The specimens are included in the list until 25 November 2016.</p>
