DE302	BioComposite Corkscrew Suture Anchor	The threaded design over the entire length of the suture anchor provides substantially higher pull-out strength than comparable anchors in poor quality bone. The fully threaded design also prevents anchor "pull-back" that may occur with countersunk anchors. The internal drive mechanism substantially increases resistance to stripping during insertion into hard bone. The recessed FiberWire suture eyelet is self-aligning and minimizes suture abrasion during knot tying.	4.5mm - 5.5mm	\$527.00		
DE306	BioComposite SwiveLock	The SwiveLock is a 4.75 or 5.5mm twist-in knotless anchor. This anchor functions very similar to the PushLock but with a twist-in design. This anchor is available with a b-TCP and PLLA anchor body and PEEK eyelet.	4.75mm - 5.5mm	\$527.00
