1 Name

This is the Amendment Statement of Principles concerning *migraine (Reasonable Hypothesis)* (No. 15 of 2020).

2 Commencement

This instrument commences on 23 March 2020.

3 Authority

This instrument is made under subsections 196B(2) and (8) of the *Veterans' Entitlements Act 1986*.

4 Amendment

The Statement of Principles concerning migraine (*Reasonable Hypothesis*) (No. 7 of 2018) (Federal Register of Legislation No. F2018L00012) is amended in the following manner:

| Section | Amendment |
|-------------------------|--|
| 7(2) | <p>Replace the existing definition in subsection 7(2) with the following:</p> <p>For the purposes of this Statement of Principles, migraine:</p> <p>(a) means migraine without aura, migraine with aura (which includes basilar migraine, sporadic hemiplegic migraine and retinal migraine), chronic migraine and vestibular migraine; and</p> <p>(b) excludes familial hemiplegic migraine, abdominal migraine, migrainous infarction, amaurosis fugax, cluster headache, tension-type headache, headache attributable to structural abnormalities or inflammatory disorders of the head and neck, and headache attributable to systemic disease.</p> <p>Note: <i>chronic migraine</i>, <i>migraine with aura</i>, <i>migraine without aura</i> and <i>vestibular migraine</i> are defined in the Schedule 1 – Dictionary.</p> |
| Schedule 1 – Dictionary | <p>Insert the following definitions of "<i>chronic migraine</i>", "<i>ICHD-3</i>", "<i>migraine with aura</i>", "<i>migraine without aura</i>" and "<i>vestibular migraine</i>" in alphabetical order:</p> <p><i>chronic migraine</i> means a neurological disorder meeting the following diagnostic criteria (derived from ICHD-3):</p> <p>A. Headache on greater than 14 days per month for greater than three months, and fulfilling criteria B and C.</p> <p>B. Occurring in a patient who has had at least five attacks of any combination of migraine without aura or</p> |

| | |
|--|--|
| | <p>migraine with aura.</p> <p>C. On greater than seven days per month for more than three months, fulfilling any of the following:</p> <ol style="list-style-type: none"> 1. criteria C and D for migraine without aura; 2. criteria B and C for migraine with aura; or 3. believed by the patient to be migraine at onset and relieved by a triptan or ergot derivative. <p>D. Not better accounted for by another ICHD-3 diagnosis.</p> <p>Note: ICHD-3 is also defined in the Schedule 1 – Dictionary.</p> <p>ICHD-3 means the International Headache Society: <i>International Classification of Headache Disorders</i>, Third Edition.</p> <p>migraine with aura means a neurological disorder meeting the following diagnostic criteria (derived from ICHD-3):</p> <ol style="list-style-type: none"> A. At least two attacks fulfilling criteria B and C. B. One or more of the following fully reversible aura symptoms: <ol style="list-style-type: none"> 1. visual; 2. sensory; 3. speech and/or language; 4. motor; 5. brainstem; or 6. retinal. C. At least three of the following six characteristics: <ol style="list-style-type: none"> 1. at least one aura symptom spreads gradually over ≥ 5 minutes; 2. two or more aura symptoms occur in succession; 3. each individual aura symptom lasts between five and 60 minutes. When three symptoms occur during an aura, the acceptable maximal duration is 3 x 60 minutes. Motor symptoms last up to 72 hours; 4. at least one aura symptom is unilateral; 5. at least one aura symptom is positive; or 6. the aura is accompanied, or followed within 60 minutes, by headache. D. Not better accounted for by another ICHD-3 diagnosis. |
|--|--|

Note 1: Migraine with aura is also known as classic or classical migraine and includes migraine with typical aura, migraine with brainstem aura (basilar migraine), sporadic hemiplegic migraine and retinal migraine.

Note 2: **ICHD-3** is also defined in the Schedule 1 – Dictionary.

migraine without aura means a neurological disorder meeting the following diagnostic criteria (derived from ICHD-3):

- A. At least five attacks fulfilling criteria B-D.
- B. Headache attacks in adults lasting between four and 72 hours (untreated or unsuccessfully treated) and in persons aged under 18 years, attacks lasting between two and 72 hours.
- C. Headache has at least two of the following four characteristics:
 - 1. unilateral location;
 - 2. pulsating quality;
 - 3. moderate or severe pain intensity; or
 - 4. aggravation by routine physical activity or causing avoidance of routine physical activity.
- D. During headache at least one of the following:
 - 1. nausea and/or vomiting; or
 - 2. photophobia and phonophobia.
- E. Not better accounted for by another ICHD-3 diagnosis.

Note 1: Migraine without aura is also known as common migraine.

Note 2: **ICHD-3** is also defined in the Schedule 1 – Dictionary.

vestibular migraine means a neurological disorder meeting the following diagnostic criteria (derived from ICHD-3):

- A. At least five episodes fulfilling criteria C and D.
- B. A current or past history of migraine without aura or migraine with aura.
- C. Vestibular symptoms of moderate or severe intensity, lasting between five minutes and 72 hours with the vestibular symptoms including spontaneous vertigo, positional vertigo, visually-induced vertigo, head motion-induced vertigo, and head motion-induced dizziness with nausea.
- D. At least half of episodes are associated with at least one of the following three migrainous features:
