

## **Heard Island and McDonald Islands Fishery (Total Allowable Catch) Determination 2021**

---

The Australian Fisheries Management Authority makes the following determination in accordance with a decision made by the Commission under section 23 of the *Fisheries Administration Act 1991*.

Dated                    23 November 2021

Wez Norris  
Chief Executive Officer  
for and on behalf of the Australian Fisheries Management Authority

---

---

## 1 Name

This instrument is the *Heard Island and McDonald Islands Fishery (Total Allowable Catch) Determination 2021*.

## 2 Commencement

This instrument commences on 1 December 2021.

## 3 Cessation

This instrument ceases on 1 December 2022.

## 4 Authority

This instrument is made pursuant to paragraph 17(6)(aa) of the Act and under section 11 of the Management Plan.

## 5 Definitions

Note 1: A number of expressions used in this instrument are defined in definitions section of the Management Plan, including the following:

- (a) *fishing year*;
- (b) *fishery*;
- (c) *target species*; and
- (d) *total allowable catch*;

Note 2: A number of expressions used in this instrument are defined in definitions section of the Act, including the following:

- (a) *take*.

In this instrument:

**Management Plan** means the *Heard Island and McDonald Islands Fishery Management Plan 2002*.

**Act** means the *Fisheries Management Act 1991*.

## 6 Determination of total allowable catch

- (1) The total allowable catch for target species and the limits to the amounts that may be taken of other species in the fishery for the 2021/2022 fishing year, commencing on 1 December 2021 and ending on 30 November 2022, are determined in accordance with this section.
- (2) For the purpose of subsection 11(1) of the Management Plan, the total allowable catch for target species is determined to be:
  - (a) 2,760 tonnes for Patagonian toothfish (*Dissostichus eleginoides*); and
  - (b) 1,528 tonnes for Mackerel icefish (*Champscephalus gunnari*).

- 
- (3) For the purpose of subsection 11(2) of the Management Plan, the limits to the amounts that may be taken of other species are determined to be:
- (a) 409 tonnes combined for Caml grenadier (*Macrourus caml*) and Whitson's grenadier (*Macrourus whitsoni*); and
  - (b) 360 tonnes combined for Bigeye grenadier *Macrourus holotrachys* and Ridge scaled rattail (*Macrourus carinatus*); and
  - (c) 1,663 tonnes for Unicorn icefish (*Channichthys rhinoceratus*); and
  - (d) 120 tonnes combined for skates and rays (*Bathyraja* spp.); and
  - (e) 80 tonnes for Grey rockcod (*Lepidonotothen squamifrons*); and
  - (f) for all other species caught in the fishery, 50 tonnes for each individual species.
