

**Food Standards (Application A1248 – Glucoamylase from GM *Aspergillus niger* (gene donor: *Gloeophyllum trabeum*) as a processing aid) Variation**

---

The Board of Food Standards Australia New Zealand gives notice of the making of this variation under section 92 of the *Food Standards Australia New Zealand Act 1991*. The variation commences on the date specified in clause 3 of this variation.

Dated 2 December 2022

Leise Berven  
Delegate of the Board of Food Standards Australia New Zealand

**Note:**

This variation will be published in the Commonwealth of Australia Gazette No. FSC 154 on 8 December 2022. This means that this date is the gazettal date for the purposes of clause 3 of the variation.

## 1 Name

This instrument is the *Food Standards (Application A1248 – Glucoamylase from GM Aspergillus niger (gene donor: Gloeophyllum trabeum) as a processing aid) Variation*.

## 2 Variation to a Standard in the *Australia New Zealand Food Standards Code*

The Schedule varies a Standard in the *Australia New Zealand Food Standards Code*.

## 3 Commencement

The variation commences on the date of gazettal.

### Schedule

#### Schedule 18—Processing aids

##### [1] Subsection S18—9(3) (table)

Insert:

|  |  |     |
|--|--|-----|
| Glucoamylase, protein engineered variant, (EC 3.2.1.3) sourced from <i>Aspergillus niger</i> containing the glucoamylase gene from <i>Gloeophyllum trabeum</i> | For use in starch processing and the production of potable alcohol | GMP |
|--|--|-----|

##### [2] Subsection S18—9(3) (note after table)

Repeal the note, substitute:

**Note** Some enzyme sources identified in this table are protein engineered. If such an enzyme is used as a processing aid, the resulting food may have as an ingredient a food produced using gene technology, and the requirements relating to foods produced using gene technology will apply—see Standard 1.2.1 and Standard 1.5.2. The relevant enzymes are the following:

- Endo-1,4- $\beta$ -xylanase, protein engineered variant;
- Glucoamylase, protein engineered variant;
- Maltogenic  $\alpha$ -Amylase, protein engineered variant;
- Protein engineered enzymes used in the manufacture of various steviol glycosides.
