Repatriation Medical Authority

EXPLANATORY STATEMENT

**STATEMENT OF PRINCIPLES CONCERNING
MALIGNANT NEOPLASM OF THE PROSTATE
(REASONABLE HYPOTHESIS) (NO. 3 OF 2023)**

VETERANS' ENTITLEMENTS ACT 1986
MILITARY REHABILITATION AND COMPENSATION ACT 2004

1. This is the Explanatory Statement to the *Statement of Principles concerning malignant neoplasm of the prostate (Reasonable Hypothesis)* (No. 3 of 2023).

Background

2. The Repatriation Medical Authority (the Authority), under subsection 196B(8) of the *Veterans' Entitlements Act 1986* (the VEA), repeals Instrument No. 53 of 2014 (Federal Register of Legislation No. F2014L00522) determined under subsection/s 196B(2) and (8) of the VEA concerning **malignant neoplasm of the prostate**.
3. The Authority is of the view that there is sound medical-scientific evidence that indicates that **malignant neoplasm of the prostate** and **death from malignant neoplasm of the prostate** can be related to particular kinds of service. The Authority has therefore determined pursuant to subsection 196B(2) of the VEA a Statement of Principles concerning **malignant neoplasm of the prostate (Reasonable Hypothesis)** (No. 3 of 2023). This Instrument will in effect replace the repealed Statement of Principles.

Purpose and Operation

4. The Statement of Principles will be applied in determining claims under the VEA and the *Military Rehabilitation and Compensation Act 2004* (the MRCA).
5. The Statement of Principles sets out the factors that must as a minimum exist, and which of those factors must be related to the following kinds of service rendered by a person:
 - operational service under the VEA;
 - peacekeeping service under the VEA;
 - hazardous service under the VEA;
 - British nuclear test defence service under the VEA;
 - warlike service under the MRCA;
 - non-warlike service under the MRCA,

before it can be said that a reasonable hypothesis has been raised connecting malignant neoplasm of the prostate or death from malignant neoplasm of the prostate, with the circumstances of that service. The Statement of Principles has been determined for the purposes of both the VEA and the MRCA.

6. This Instrument results from an investigation notified by the Authority in the Government Notices Gazette of 2 November 2021 concerning malignant neoplasm of the prostate in accordance with section 196G of the VEA. The investigation involved an examination of the sound medical-scientific evidence now available to the Authority, including the sound medical-scientific evidence it has previously considered.
7. The contents of this Instrument are in similar terms as the repealed Instrument. Comparing this Instrument and the repealed Instrument, the differences include:
 - adopting the latest revised Instrument format, which commenced in 2015;
 - specifying a day of commencement for the Instrument in section 2;
 - revising the definition of 'malignant neoplasm of the prostate' in subsection 7(2);
 - including ICD-10-AM codes for 'malignant neoplasm of the prostate' in subsection 7(3);
 - revising the factor in subsection 9(1) concerning inhaling, ingesting or having cutaneous contact with a chemical agent contaminated by 2,3,7,8-tetrachlorodibenzo-para-dioxin (TCDD);
 - revising the factor in subsection 9(2) concerning being on land in Vietnam or at sea in Vietnamese waters.
 - revising the factor in subsection 9(3) concerning consuming an average of at least 400 grams per day of dairy products;
 - new factor in subsection 9(4) concerning being exposed to arsenic;
 - new factor in subsection 9(5) concerning inhaling fumes, vapours or dusts containing hexavalent chromium;
 - new factor in subsection 9(6) concerning having received a cumulative equivalent dose of at least 0.1 sievert of ionising radiation to the prostate;
 - new factor in subsection 9(7) concerning having periodontitis;
 - revising the factor in subsection 9(8) concerning consuming alcohol;
 - revising the factor in subsection 9(9) concerning having smoked tobacco products;
 - new factor in subsection 9(10) concerning the use of smokeless tobacco;
 - revising the factor in subsection 9(11) concerning being obese;
 - new factor in subsection 9(12) concerning having diabetes mellitus;
 - new definitions of '*being exposed to arsenic as specified*', '*cumulative equivalent dose*', '*one pack-year*' and '*smokeless tobacco*' in Schedule 1 - Dictionary;
 - revising the definitions of '*being obese*', '*being on land in Vietnam*', '*being at sea in Vietnamese waters*', '*inhaling, ingesting or having cutaneous contact with a chemical agent contaminated by 2,3,7,8-tetrachlorodibenzo-para-dioxin (TCDD)*' in Schedule 1 - Dictionary; and
 - deleting the definition of '*pack-years of cigarettes, or the equivalent thereof in other tobacco products*'.

Incorporation

8. The definition of "cumulative equivalent dose" contained in the Schedule 1 – Dictionary incorporates the *Guide to calculation of 'cumulative equivalent dose' for the purpose of applying ionising radiation factors contained in Statements of Principles determined under Part XIA of the Veterans' Entitlements Act 1986 (Cth)*, Australian Radiation Protection and Nuclear Safety Agency, as in force on 2 August

2017. This writing is incorporated pursuant to subsection 14(b) of the *Legislation Act 2003*.

Consultation

9. Prior to determining this Instrument, the Authority advertised its intention to undertake an investigation in relation to malignant neoplasm of the prostate in the Government Notices Gazette of 2 November 2021, and circulated a copy of the notice of intention to investigate to a wide range of organisations representing veterans, service personnel and their dependants. The Authority invited submissions from the Repatriation Commission, the Military Rehabilitation and Compensation Commission, organisations and persons referred to in section 196E of the VEA, and any person having expertise in the field. No submissions were received for consideration by the Authority in relation to the investigation.
10. On 23 August 2024, the Authority wrote to organisations representing veterans, service personnel and their dependants regarding the proposed Instrument and the medical-scientific material considered by the Authority. This letter emphasised the deletion of aspects of a factor. Specifically it was proposed to substitute the following factor; 'increasing animal fat consumption by at least 40 percent and to at least 50 grams per day, and maintaining these levels for at least five years within the 25 years before the clinical onset of malignant neoplasm of the prostate' with the following factor; 'consuming an average of at least 400 grams per day of dairy products, for at least 5 years within the 20 years before the clinical onset of malignant neoplasm of the prostate;'. The Authority provided an opportunity to the organisations to make representations in relation to the proposed Instrument prior to its determination. No submissions were received for consideration by the Authority. No changes were made to the proposed Instrument following this consultation process.

Human Rights

11. This instrument is compatible with the Human Rights and Freedoms recognised or declared in the International Instruments listed in Section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*. A Statement of Compatibility with Human Rights follows.

Finalisation of Investigation

12. The determining of this Instrument finalises the investigation in relation to malignant neoplasm of the prostate as advertised in the Government Notices Gazette of 2 November 2021.

Statement of Compatibility with Human Rights

(Prepared in accordance with Part 3 of the Human Rights (Parliamentary Scrutiny) Act 2011)

Instrument No.: **Statement of Principles No. 3 of 2023**

Kind of Injury, Disease or Death: **Malignant neoplasm of the prostate**

This Legislative Instrument is compatible with the human rights and freedoms recognised or declared in the international instruments listed in section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*.

Overview of the Legislative Instrument

1. This Legislative Instrument is determined pursuant to subsection 196B(2) of the *Veterans' Entitlements Act 1986* (the VEA) for the purposes of the VEA and the *Military Rehabilitation and Compensation Act 2004* (the MRCA). Part XIA of the VEA requires the determination of these instruments outlining the factors connecting particular kinds of injury, disease or death with service such being determined solely on the available sound medical-scientific evidence.
2. This Legislative Instrument:-
 - facilitates claimants in making, and the Repatriation Commission and the Military Rehabilitation and Compensation Commission in assessing, claims under the VEA and the MRCA respectively, by specifying the circumstances in which medical treatment and compensation can be extended to eligible persons who have malignant neoplasm of the prostate;
 - facilitates the review of such decisions by the Veterans' Review Board and the Administrative Appeals Tribunal;
 - outlines the factors which the current sound medical-scientific evidence indicates must as a minimum exist, before it can be said that a reasonable hypothesis has been raised, connecting malignant neoplasm of the prostate with the circumstances of eligible service rendered by a person, as set out in clause 5 of the Explanatory Statement;
 - replaces Instrument No. 53 of 2014; and
 - reflects developments in the available sound medical-scientific evidence concerning malignant neoplasm of the prostate which have occurred since that earlier instrument was determined.
3. The Instrument is assessed as being a technical instrument which improves the medico-scientific quality of outcomes under the VEA and the MRCA.

Human Rights Implications

4. This Legislative Instrument does not derogate from any human rights. It promotes the human rights of veterans, current and former Defence Force members as well as other persons such as their dependents, including:
- the right to social security (Art 9, *International Covenant on Economic, Social and Cultural Rights*; Art 26, *Convention on the Rights of the Child* and Art 28, *Convention on the Rights of Persons with Disabilities*) by helping to ensure that the qualifying conditions for the benefit are 'reasonable, proportionate and transparent'¹;
 - the right to an adequate standard of living (Art 11, ICESCR; Art 27, CRC and Art 28, CRPD) by facilitating the assessment and determination of social security benefits;
 - the right to the enjoyment of the highest attainable standard of physical and mental health (Art 12, ICESCR and Art 25, CRPD), by facilitating the assessment and determination of compensation and benefits in relation to the treatment and rehabilitation of veterans and Defence Force members;
 - the rights of persons with disabilities by facilitating the determination of claims relating to treatment and rehabilitation (Art 26, CRPD); and
 - ensuring that those rights "will be exercised without discrimination of any kind as to race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status" (Art 2, ICESCR).

Conclusion

This Legislative Instrument is compatible with human rights as it does not derogate from and promotes a number of human rights.

Repatriation Medical Authority

¹ In General Comment No. 19 (The right to social security), the Committee on Economic, Social and Cultural Rights said (at paragraph 24) this to be one of the elements of ensuring accessibility to social security.
